## RECENT PROJECTS

### • Educational Institutes:

#### • 1st and 2nd Technical – Professional Schools in Kiparissia

LAGI.PLAN was assigned by the School Committee of 1st and 2nd Technical – Professional Schools in Kiparissia and undertook the project of planning, designing and implementing the wired backbone network and the wireless access network to the Internet for the aforementioned School Units, at the physical level and the network level, as well as the application services level.

The project was completed successfully on May 20, 2008

### • Municipalities:

Projects in the following Municipalities:

- Thouria
- Gastouni
- Makedonida
- Skiros

LAGI.PLAN participated in a consortium for the planning, design and implementation of a metropolitan wireless access network in the municipalities of Thouria, Gastouni, Makedonida and Skiros, in the framework of the European Project Bleu-Med. The Project was completed on June 22, 2008 and, since then, the inhabitants of the above municipalities enjoy free wireless access to the Internet, based on the 802.11 b/g Standard (Wi – Fi).

The wireless coverage of the network in every municipality includes squares, schools, sports facilities, leisure centers, areas around public buildings and specific areas within the municipality boundaries, for which coverage requirements were set by the corresponding municipal authorities, according to the specifications of the Project Bleu-Med.

### • European Research Projects:

LAGI.PLAN is an active participant in the activities of the European Research Project Self –NET (Self – Management of Cognitive Future Internet Elements), Grant Agreement No 224344 with the European Commission.

The Project has a duration of 30 months and it is included in the Community Actions FP7-ICT-2.1.6- New paradigms and experimental facilities), aiming at designing applications for the Future Internet.
